Five Categories of Evidence and Data

Demographic Data

1

Enrollment history, ethnicity, gender, special population, attendance, discipline, transportation, scholar grouping…

Perception Data

2

Satisfaction and perception surveys, observations, focus groups…

Student Academic Data

3

Classroom assessments, Diagnostic assessments, Formative assessments, Current report card marks, Prior report card marks, Credit accumulation by subject…

Program, Process, Policy Data

4

Alignment of local instruction and assessment to MN Standards, Specially funded (Title 1, etc.), Academic curricular sequences, Academic support programs, Extracurricular programs, Instructional Strategies, Leadership Capacity

Fidelity Data

5

Fidelity of Implementation as self assessed, Fidelity of Implementation from walk-throughs, Measures of commitment to students & families, staff, school, community, and profession

Adapted by the MN Regional Centers of Excellence from: Bernhardt, Victoria L. Data Analysis for Continuous School Improvement. 2013

Linking Data

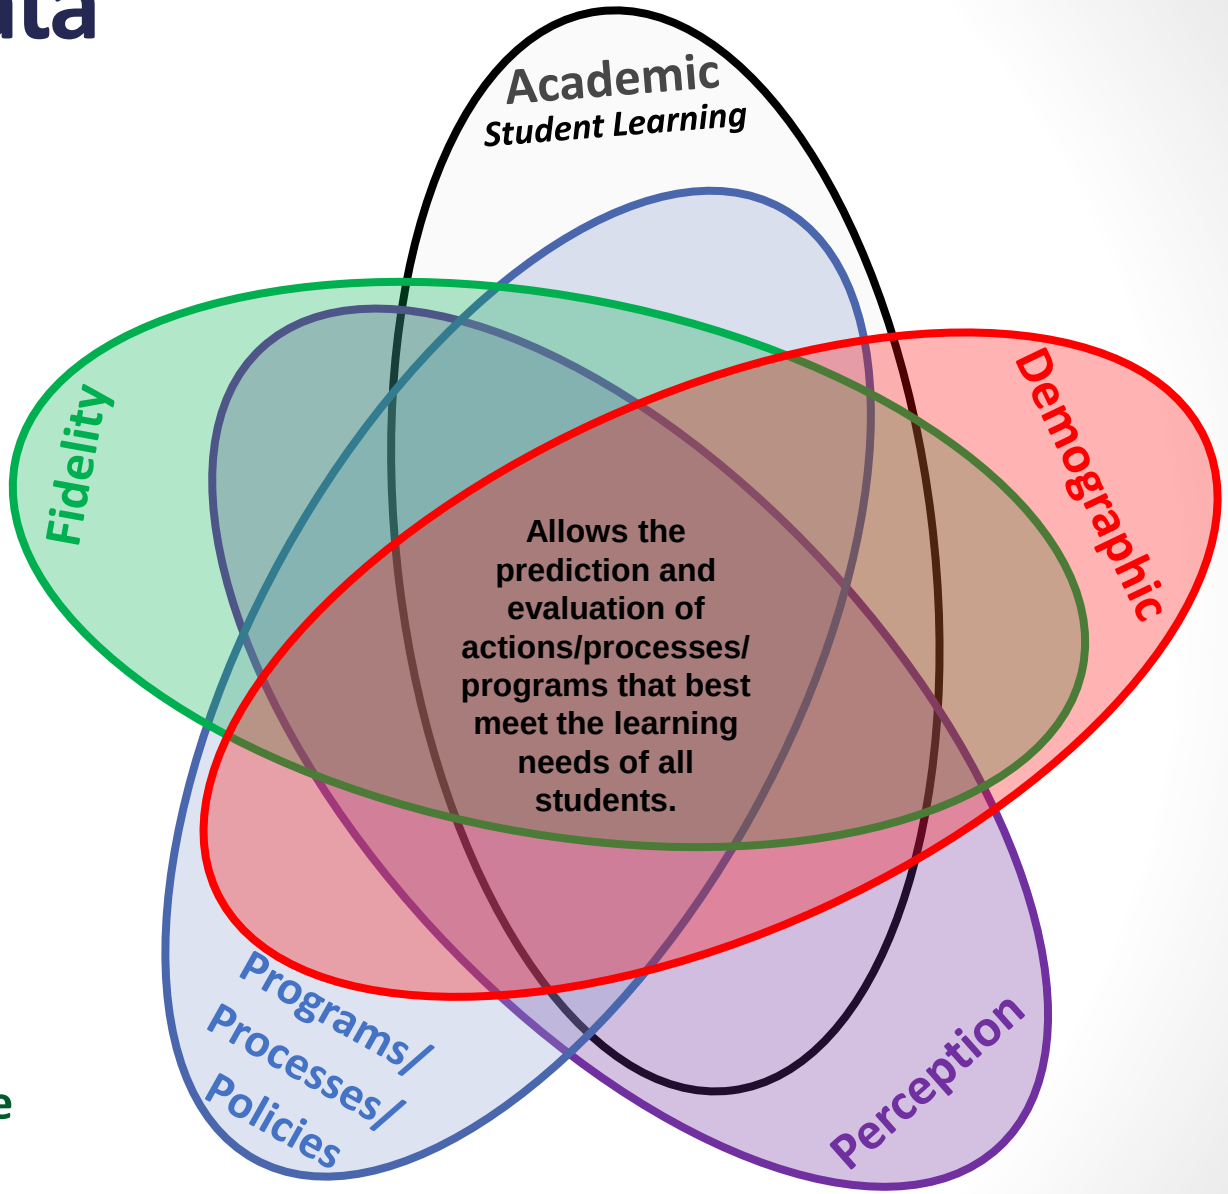
Who are we?

How are we seen by those we serve, and how do we see ourselves?

How are students doing?

How effective are our programs, processes, and policies?

Are we doing what we said we would do?



Adapted by the MN Regional Centers of Excellence from: Bernhardt, Victoria L. Data Analysis for Continuous School Improvement. 2013
