Reflecting on Your System

Consider your learning in this module about the conditions that can support systemic data use in schools and districts. What strategies can help you understand and improve these conditions in your own school or district? Use this table to capture your reflections on your current system and ideas for how to improve each condition at your school or district.

Condition to Support Systemic Data Use in Schools	Reflect on your current system. • For each condition identified below, consider: ▪ What strengths do you see in this area? ▪ What concerns do you have? ▪ What more do you want to learn?	How will you learn more and build a plan to improve? • For each condition identified below, consider: ▪ Who can help me understand, evaluate, and improve? ▪ What questions do I need to ask? ▪ What evidence can inform my understanding?
