# Balanced and Comprehensive Assessment Systems

# A comprehensive assessment system includes:

- ✓ Multiple opportunities for students to demonstrate their learning, reflecting the depth and breadth of the standards
- ✓ Assessments coherently linked through clear standards-based learning targets
- ✓ Continuous information documenting student progress over time
- ✓ Tools and strategies that are accessible and inclusive of all learners, including a range of appropriate challenge and scaffolds

For more information and to see the components in a balanced and comprehensive assessment system, visit <u>Testing 1, 2, 3</u>. A balanced assessment system includes:

- ✓ A variety of assessment types compatible with how students learn the content domain
- ✓ Assessments that each have a clear purpose and are not redundant
- ✓ Useful information for guiding decisions that match the intended use of the assessment
- ✓ A greater emphasis on learning over grading, including formative assessment practices that promote student agency

# State

- Evaluate learning of the standards in relation to school improvement efforts
- MCA and MTAS/Alternate MCA;
  ACCESS and WIDA Alternate ACCESS

District

- Diagnose the cause of something needing further investigation; Predict future outcomes
- Universal screening, diagnostic, progress monitoring, benchmark and interim assessments

- Inform instruction
- · Formative and summative assessments

National Research Council 2001; Shepard, Penuel, and Pellegrino 2018; Marion et al. 2019

# Components of a Balanced, Comprehensive, and Equitable Assessment System

Assessment is the process of gathering evidence of student learning to guide educational decisions. Assessments are designed to provide information about student learning for a particular purpose. The purposes and uses of assessment information differ at each level of the educational system (classroom, district/schools, and state) and for the stakeholders using the information. There is no single assessment that can be used to support all purposes and uses. Together, information from each layer should describe the learning expectations defined in the standards.

### Primary Purpose Key:

Measure individual student achievement

Inform instruction and planning

Program and policy evaluation

Indicator of students who may need additional supports

### Classroom

# District/School

### State

### Formative Assessment Process Ongoing, during learning

Teachers use evidence during lessons to guide feedback and next steps in learning

Students use evidence during peer feedback, self-assessment, and discourse

- · Shows evidence of learning as it is developing
- Both teachers and students use evidence to inform next steps in learning

### Interim/Benchmark 2-3 times per year

### Benchmark, common assessments

- · Evidence of retained learning at various benchmarks throughout the year or progress in specific skills
- · Most useful to groups of teachers and school leaders for identifying concerns or allocating resources

### Screening and Intervention Assessments As needed

Diagnostic assessment, universal screener, and progress monitoring

- · Evidence of student strengths and needs in specific skill areas to inform instructional
- · Most useful to inform targeted instruction and intervention in specific skill areas

### **Standardized** Summative Assessment 1 time per year, after learning

State summative assessments (e.g., MCA, **ACCESS for ELLs)** 

- · Summarized evidence of retained learning of the standards
- · Most useful to school and district leaders as one piece of information to evaluate curriculum and program alignment to standards and to ensure all students have access to rigorous, standards-based content

# Formal Classroom Assessments Weekly, monthly

Classroom summative assessments, curriculum-embedded assessments

- Evidence of retained learning across a few related lessons or a group of lessons or standards over a period of learning
- · Most useful to teachers, students, and their families as evidence of what a student has recently learned; given during a pause in learning and may contribute to grades
